

Test Technician

Highland, IL

Job Summary: Responsible for supporting and assisting the Test Engineer in the maintenance of test equipment. In addition, provides support for test equipment and test processes currently in place. Assists in development of test programs and provides support for the manufacturing testing personnel.

Reports to: Quality Engineering Manager

Essential Duties:

- Wire and maintain test fixtures and test stands. (With training and instruction from engineering.)
- Perform production test support for test problems.
- Support the calibration lab by collecting and calibrating equipment once training is complete.
- Provide a supporting role in other manufacturing support departments as needed.
- Perform other duties as assigned.

Requirements:

- Associate's degree in electrical/electronic discipline or equivalent experience (schematic interpretation a must).
- Knowledge of problem solving techniques.
- Ability to use a computer. Familiarity with Microsoft Word and Excel is desired.
- Must have the ability to be self-directed after training period and have good communication skills.
- Must be able to multi-task and prioritize well.
